- **92%** of respondents recommended placing future interns at the company they worked with
- **58%** of interns had discussions regarding the internship developing into a full-time position

## **Supervisor Exit Survey**

- **100%** strongly agreed that the student-athlete they worked with represented OSU well
- **100%** of respondents indicated that the student-athlete they worked with was equally as prepared as other interns at the company
- **100%** of employers said that the intern they worked with knew how to communicate professionally
- **94%** indicated that the BGP 2.0 program was a beneficial experience for their company

*"I worked at e-Cycle in a sales intern position, and it was absolutely amazing. I had the best experience and worked with amazing people. Not only was I able to shadow an account manager but I talked to the EVP of Sales, who is also an OSU grad, almost daily and got to sit in on meetings with people of all sales positions in the company. I was able to be a part of meetings with fortune 500 companies and would talk about them after to really understand. I also got so much experience calling people and explaining the company, I am so confident that I will be more than set to start my sales career anywhere I go.... Going in I wanted to pursue sales but did not have much knowledge about it, after finishing my internship I know 100% that I want to pursue a career in sales."*

**- Claire Morris, Women's Lacrosse**

*"We understand the demands of a student-athlete and that they cannot typically commit to a job during the school year. It is certainly a benefit to have the pay for the student-athlete supplemented. As noted above, it is a reason for us to hold a position. We appreciated having Marcus on our team this summer!"* **- Copper Run Capital**
